DISTRIBUTION, LOGISTICS & MAINTENANCE SERVICES

Maada'oozh is a Native American-owned energy and environmental services company. We offer energy solutions that assist our customers in meeting their sustainability and environmental goals. We manage a sustainable supply chain to ensure that we provide eco-friendly products and services. Maada'oozh promotes Social and Environmental Justice by supporting projects that benefit the land and communities where the projects are built. We focused on fair trade and labor practices, sustainably sourced materials, compliance with Buy American Build American Act, workforce development and community benefits, carbon-reduction measures and more. Maada'oozh wants to collaborate with you to make the world a better place for the seventh generation. Let's work together!

Procurement & Pre-Construction:

- Equipment procurement through Channel Partnerships to meet your project's schedule and budget
- Factory and equipment inspection services to ensure that manufacturing and supply chain coordination is on track to meet delivery schedules
- Sustainability and compliance services for Buy American-Build American Act, anti-slavery and anti-child labor enforcement, lifecycle assessments, workforce development and more, as needed to support environmental justice and grant compliance

Controls & Commissioning:

- CxA and standalone commissioning services for energy storage technologies and microgrid related equipment
- Controls and MV&A engineering and integration services catered to your project's specific requirements
- Sequence of Operation (SOO) development for complex project and equipment coordination

Operation and Maintenance:

- Development of O&M procedures and equipment specific maintenance schedules to meet your operational budget goals
- System monitoring, emergency response services and administration of warranty claims
- Maintenance services for batteries, inverters, DC combiners, transformers, solar PV module repairs and cleaning, flywheels, generators, and switchgear
- Management of spare parts and equipment replacements to maintain optimal system uptime

Our Alliance Partners provide industry-leading specialized services
